

Samsung Galaxy Tab 2 – How To

We have found with most of our new users that the most difficult part of the new TES system is not TES itself, but the tablet that comes along with it.

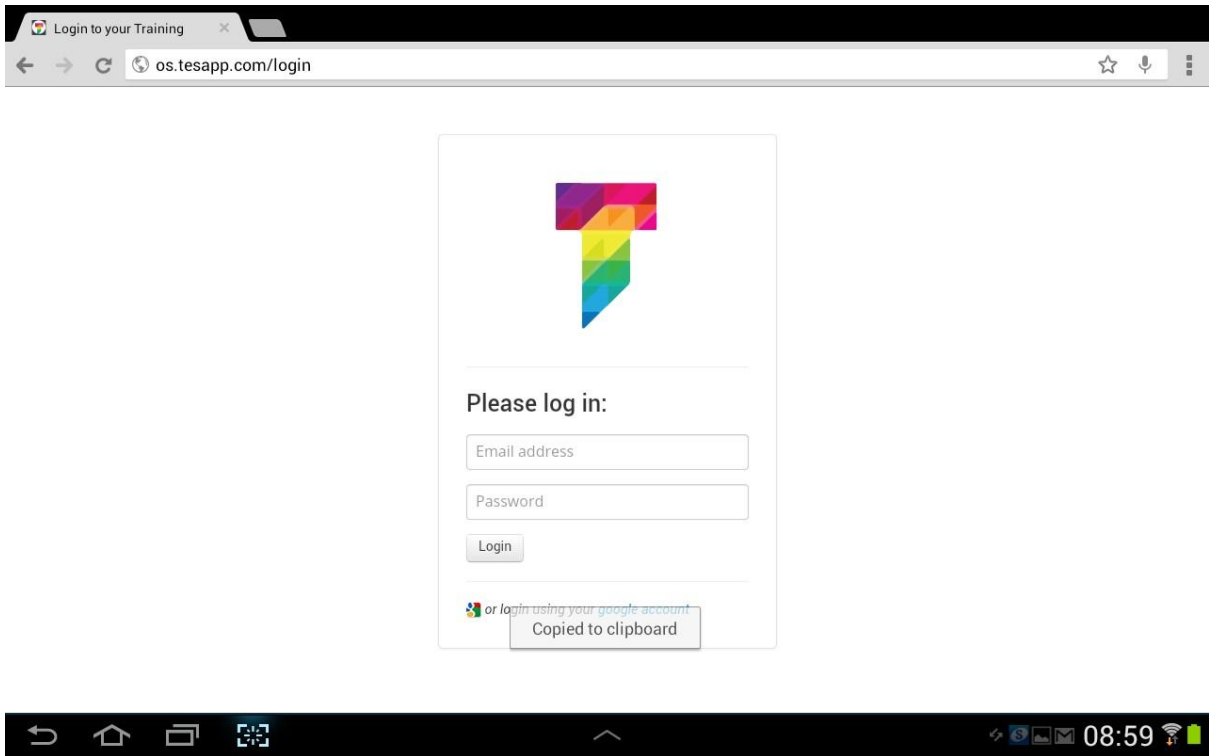

Here is a quick guide on how to use this tablet.

Once you have turned on your tablet, swipe the screen with your finger to unlock it. This will take you to your main screen. If you would like to create a password for your tablet, that is your choice. PLEASE NOTE: This is not controlled by CCCGPT, and if you forgot your password your tablet will become inaccessible.

Instructions on how to use the 'Assessor' App have been provided. Chrome is your Internet Browser where you can review the results of any work you do in Assessor. Your username and password for Assessor and os.tesapp.com/login have been provided with your tablet. Please keep these in a safe place.

GoToAssist is an application that allows the CCCGPT IT Support Officer to help with any technical issues you might be having with the Tablet. Contact CCCGPT on 02 26923 5400, and ask for the IT Support Officer. If the issue cannot be resolved over the phone, the IT Support Officer will ask you to enter a Support Key into you GoToAssist App. This will allow the IT Support Officer to access the Tablet screen from the computer.
